DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/18/2003 has been entered.

Status of claims

Claims 2, 10 and 16 were canceled by applicant [Paper No. 12 filed 7/18/2003].

Claims 7 and 9 were canceled by applicant [Paper No. 5 filed 7/16/2001].

Claims 1, 3-6, 8, 11-15 and 17-20 as amended and new claims 21 [Paper No. 12 filed 7/18/2003] are now pending.

Claims 1, 3-6, 8, 11-15 and 17-21 are subject to restriction requirement.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1651

Group I, claim(s) 1, 3-6, 8 and 11-14, drawn to a material derived from ovarian venous blood and having molecular weight within 10-30 kDa and to a pharmaceutical composition with the material.

Group II, claim(s) 15 and 17-21, drawn to a method for treating organ and tissue hypertrophy.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The corresponding special technical feature as claimed is a material derived from ovarian venous blood and having molecular weight within 10-30 kDa. The material as claimed is known in the prior art, for example: US 4,734,398 discloses the 14-18 kDa fractions isolated from human ovarian venous blood (col. 11, lines 52-54 and col.8, lines 60-65). Thus, the unity of inventions is broken.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
